PROFESSIONAL PROFILE

Software developer with a degree in Systems Analysis and Development and professional experience since 2023 across web, desktop and mobile applications. Focused on backend development, integrations, automation and business systems, from requirements analysis to production deployment. Experience with Node.js, NestJS, TypeScript, Angular, Delphi and Python.

PROFESSIONAL EXPERIENCE

PSZ Sistemas | Software Developer

Mar 2026 - Present | Full-time | Mococa, Brazil

- Develop and maintain business systems using Delphi and Firebird, delivering features, bug fixes and integrations with external services.
- Built a management dashboard, WhatsApp integration and Python automations, including an RPA workflow for Portal Postal.
- Used Firebase in product features and integrations, and implemented improvements based on customer needs and feedback from the support team.

PSZ Sistemas | Technical Support

Jan 2025 - Feb 2026 | Full-time | Mococa, Brazil

- Provided remote support through AnyDesk, diagnosed incidents, reproduced bugs and guided customers. Applied the resulting business knowledge after moving into software development.

Trusom innovation | Mid-level Full Stack Developer

Aug 2025 - Jun 2026 | Self-employed | Remote

- Developed insurance systems using Angular, NestJS and Node.js, including APIs, WebSockets, real-time chat, authentication and production support.
- Optimized an insurance quotation RPA by reusing session and token context, reducing processing time from approximately 12 to 2 minutes.
- Integrated Mercado Pago and Asaas payments, automated document workflows and built reusable components, Electron desktop applications and Capacitor hybrid applications.

Trusom innovation | Junior Full Stack Developer

Jan 2025 - Jul 2025 | Self-employed | Remote

- Built Angular interfaces, REST APIs and integrations with NestJS and Node.js. Implemented automation and asynchronous processing, and maintained PHP and WordPress applications.

Santa Casa de Misericórdia de Mococa | Software Development Intern

Jun 2023 - Dec 2024 | Internship | Mococa, Brazil

- Developed internal systems using Node.js, Vue.js and NestJS, including automated medical record requests, a talent pool platform and a custom institutional website CMS.

Vinicius Augusto dos Santos

Mid-level Full Stack Developer

SELECTED PROJECTS

Member Benefits Management System | In production

System for members, suppliers, sales, credit limits, installments and membership fees. Includes payroll return processing, legacy data reconciliation, reports and PDFs. JWT/refresh-token authentication and role-based access. Automated deployment to separate staging and production environments.

Angular, NestJS, TypeORM, MySQL, Redis, BullMQ, Socket.IO, PDFKit, Docker, Nginx and GitHub Actions.

Vyntra | Cross-platform full stack foundation

Architecture with shared DTOs and types, reusable interface components and adapters for web, desktop and mobile. Includes authentication, rate limiting, caching, queues with retries and real-time notifications.

Angular, NestJS, TypeScript, Redis, BullMQ, Socket.IO, Electron, Capacitor, SQLite and MySQL.

Automated data migration

Built a legacy-system data importer using 24 concurrent workers, processing and validating records before insertion. Included concurrency controls, retries, duplicate prevention and import logs.

ERP-connected TV menus

Built the Delphi-to-Firebase integration to synchronize products, promotions and settings. Collaborative project featuring code-based TV pairing and support for displaying one menu on multiple devices.

Local job-search assistant

Automated opportunity discovery, deduplication, profile-based ranking and resume tailoring. Uses local AI through Ollama and generates PDF, HTML and TXT documents.

Node.js, Playwright and Ollama.

TECHNICAL SKILLS

Backend and automation: Node.js, NestJS, TypeScript, REST APIs, WebSockets, Python, RPA, PHP.

Interfaces and platforms: Angular, Vue.js, HTML, CSS, JavaScript, Delphi, Electron and Capacitor.

Data and processing: MySQL, PostgreSQL, Firebird, SQLite, Firebase, TypeORM, Redis and BullMQ.

Delivery and operations: Git, Docker, Docker Compose, Nginx, GitHub Actions, CI/CD and VPS deployment.

EDUCATION

Technology Degree in Systems Analysis and Development

Faculdade de Tecnologia de São Paulo (FATEC-SP) | Jan 2023 - Dec 2024

Technical Diploma in Systems Development

ETEC João Baptista de Lima Figueiredo | Jan 2020 - Dec 2022

LANGUAGES

Portuguese: native | English: basic to intermediate
