Professional Summary

Full Stack Developer with a degree in Systems Analysis and Development and experience building web, desktop, and mobile applications, corporate systems, integrations, and automation solutions. Primarily works with Node.js, NestJS, Angular, TypeScript, PHP, Python, and Delphi, developing APIs, integrations, RPAs, and solutions involving asynchronous processing and real-time communication. Experienced with production systems, SQL/NoSQL databases, CI/CD, and complex business rules.

Technical Skills

Front-end: Angular, Vue.js, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, and WordPress.

Back-end: Node.js, NestJS, Express.js, PHP, Python, Delphi / Object Pascal, Java, .NET, and Go.

APIs, integrations & automation: REST APIs, WebSockets, Socket.IO, webhooks, JWT, refresh tokens, RBAC, rate limiting, RPA, scraping, AI integrations, WhatsApp, Mercado Pago, and Asaas.

Desktop & mobile: Electron and Capacitor.

Data & processing: SQL, PostgreSQL, MySQL, Firebird, MongoDB, Redis, Firebase, BullMQ, queues, and asynchronous processing.

DevOps & production: Docker, Git, GitHub Actions, CI/CD, Nginx, migrations, VPS deployment, troubleshooting, and production support.

Professional Experience

PSZ Sistemas | Jan 2025 - Present

Software Developer | Mar 2026 - Present | *Internal progression: Technical Support* (Jan 2025 - Feb 2026)

- Develops, maintains, and evolves corporate systems and ERP solutions using Delphi / Object Pascal, Firebird, Python, Firebase, and SQL, covering business rules through production support.
- Implements integrations with external services and WhatsApp, as well as Python automation and RPA for Portal Postal, reducing manual activities.
- Developed a management dashboard with charts and KPIs, improving information visibility and monitoring for users.
- Works on bug fixes, feature evolution, and improvement discovery with clients and the support team; prior support experience strengthened incident diagnosis and error reproduction.

Trusom Innovation | Jan 2025 - Jun 2026 | Contractor

Mid-Level Full Stack Developer | Aug 2025 - Jun 2026 | *Internal progression: Junior Full Stack Developer* | Jan 2025 - Jul 2025

- Developed and evolved corporate solutions for the insurance sector using Angular, NestJS, Node.js, TypeScript, PHP, Electron, and Capacitor, with autonomy in defining and implementing features.
- Developed REST APIs, integrations, WebSockets, and real-time communication, as well as authentication, authorization, security, asynchronous processing, and reusable components.
- Built RPAs, document automation, and integrations with Mercado Pago and Asaas; redesigned a quotation automation flow, reducing execution time from approximately 12 to 2 minutes (~83%).
- Developed a contracts and benefits system integrated with payroll, including eligibility rules, deductions, and company transfers, and participated in deployment, production support, and ongoing evolution.

Irmandade da Santa Casa de Misericórdia de Mococa | Jun 2023 - Dec 2024

Systems Development Intern

- Developed and maintained internal systems and web applications using Node.js, NestJS, and Vue.js, working across back-end, front-end, integrations, architecture, and databases.
- Built solutions such as medical-record request automation, an internal Talent Pool, and a custom CMS for the institutional website, with a focus on usability, security, and maintainability.

Projects & Technical Results

Talent Pool | NestJS | Node.js | JWT

Irmandade da Santa Casa de Misericórdia de Mococa

- Internal platform connecting qualified candidates with openings at the institution, providing a secure and intuitive experience for recruiters and applicants.

Technologies: NestJS, Vue.js, Node.js, MySQL, JWT, Nginx, HTML5, and CSS.

Benefits & Agreements Management System | Angular | NestJS | Redis

Corporate system for a labor association

- End-to-end solution built from scratch, from design and front-end to back-end and security, covering members, vendors, sales, credit limits, installments, monthly fees, payroll returns, reconciliation, and reporting.
- Member, vendor, and administrator profiles with dashboards, credit checks, sales, reports, and database migration. Stack: Angular, NestJS, MySQL, Redis, BullMQ, and Socket.IO; JWT / refresh tokens, authentication, authorization, rate limiting, and migrations.
- Scraping automation with 24 concurrent workers for extraction and import from a legacy system, plus a CI/CD pipeline and VPS deployment using GitHub Actions, migrations, and Nginx.

Education

Technology Degree in Systems Analysis and Development - FATEC Mococa | Completed in 2024

Technical Diploma in Systems Development - ETEC João B. de L. Figueiredo | Completed in 2022

Languages: Portuguese (Native) | English (Intermediate)

Certifications

Junior Cybersecurity Analyst Career Path - Cisco Networking Academy | Completed: Dec 2024

Advanced Systems Architecture - DIO

Advanced Practices in ReactJS Projects - DIO

Agile Projects with SCRUM - DIO
